

Login Attempt Control System

```
correct_password = "admin123"
max_attempts = 3
attempts = 0
while attempts < max_attempts:
    password = input("Enter Password: ")
    if password == correct_password:
        print("Login Successful!")
        break
    else:
        attempts += 1
        remaining = max_attempts - attempts
        print(f"Incorrect Password! Attempts left: {remaining}")
if attempts == max_attempts:
    print("Access Restricted! Too many failed attempts.")
```

OUTPUT:

```
Enter Password:  "admin123"
Incorrect Password! Attempts left: 2
Enter Password:  admin123
Login Successful!
```
